

MIND AWARD

**AWARENESS, EDUCATION,
SCIENCE, ART AND PEACE**

Dr. Gerald Hüther will get the MIND AWARD 2020/21

Jury honours famous brain researcher with the special award

On January 15, 2021, the special award will be given to Professor Dr. Gerald Hüther as part of a recording in which jury member Dr. Ruediger Dahlke (2014 award winner) will give the laudatory speech. The dialogue will be moderated by Sabiene Jahn. Sabiene Jahn studied communication, works as a freelance artist and editor and organizes the lecture series "Koblenz: In Dialog".

Gerald Hüther, born in 1951, is probably the most famous neuroscientist in Germany and became known to a wide audience through his generally understandable, consciousness-expanding lectures and books, which above all give new impulses to the subject of education, but primarily stimulate own and new thinking.

The jury's reasoning is as follow:

Dr. Gerald Hüther is honoured for his great educational work on the basis of scientifically proven research results, which he processes in such a way that they are understandable to the general public and help to expand perception and to develop mankind. Socially relevant topics such as the development of potential and dignity are decisively shaped by his commitment and have reached many people through it.

His recently published book "Ways out of fear: About the art of accepting the unpredictability of life" is the current example of concrete help in everyday life with Corona, and beyond.

The MIND AWARD is the most important and first international award for **awareness, education, research, art and peace**. The MIND AWARD sets a sign for their significant influence on all areas of life (from science to economy to politics) in our world that is growing closer together.

Ambassadors are Sister Dr. Lea Ackermann, Pater Anselm Grün and Reinhold Messner.

Since 2009 the MIND AWARD has been a worldwide symbol for this common endeavor. This consciously universal award has already been awarded to well-known personalities who bravely and consistently stand up for this legacy of peaceful holistic evolution.

///// Previous awardees are among others: Dr. Daniele Ganser, Deva Premal & Miten, Die Sendung mit der Maus, Dr. Ruediger Dahlke (doctor, author), Dr. Franz Alt, Professor Declan Kennedy, Prof. Götz Werner (dm drogeriemarkt, basic income), Prof. Dr. Fritz Albert Popp (biophotons), Volkshochschulen (VHS), Reiner Meutsch and Joachim Franz, as well as pastor Jürgen Fliege and Dr. Dieter Broers..

The undoped special award is given at the discretion and recommendation of the jury for particularly outstanding achievements or for a life's work.

The **nomination criteria** are as follows:

- Who: Persons or organisations demonstrating a holistic and sustainable approach to what they do.
 - What: Ethical conduct and innovative (future) concepts for mankind and the environment.
 - How: Development work, creating awareness, educational measures and publications.
-

About the award winner, CV:

The neurobiologist and brain researcher Dr. Gerald Hüther is a knowledge mediator and translator in one person. In practice, he deals with neurobiological prevention research within the framework of various initiatives and projects. He writes non-fiction books, gives lectures, organizes congresses, works as a consultant for politicians and entrepreneurs and is a frequent guest on radio and television.

He studied and researched in Leipzig and Jena, then since 1979 at the Max Planck Institute for Experimental Medicine in Göttingen. He received a Heisenberg grant from the German Research Foundation and was Professor of Neurobiology at the University of Göttingen from 2004 to 2016. From 1994-2006 he headed a research department at the psychiatric clinic in Göttingen. 2006 - 2016 he dealt with the dissemination of knowledge in the field of neurobiological prevention research. In 2015, the Academy for Developing Potential was founded and took over its management as a board member.

In his public relations work, he is concerned with the dissemination and implementation of findings from modern brain research. Gerald Hüther sees himself as a "bridge builder" between scientific knowledge and social or individual life practice. The aim of his activities is to create more favourable conditions for the development of human potential.

Insights and views

The jury combines beneath Dr. Ruediger Dahlke (www.dahlke.at) experts from civic society, politics, economics and the sciences. All of them have been dealing with awareness-raising and social development for years. New awards are currently being prepared together with well-known personalities on the advisory board. The establishment of a foundation is sought. Endowments are under construction.

In the past it was just symbolic of the new holistic consciousness to open that MIND completely to the general public as a reflection of the zeitgeist. ONE MIND should include everyone.

However, both the voting with a public decision in 2011 and the mixed form of jury and the public in 2012 showed, that the election results could be manipulated too much, which is why the decision was put back into the hands of a competent jury.

„**Life in peace and love changes everything**“, knows initiator Achim Kunst and is convinced that all people are connected to one another - here and now in a short or long life on earth.

The human-being Achim Kunst, is particularly keen to link education and awareness of society and the economy. As a qualified social pedagogue and industrial clerk, he knows their characteristics, as a long-term coach their requirements. His professional experience repeatedly reflects the explosive nature of this topic: “Just as the Alternative Nobel Prize extends and supplements the classic Nobel Prize categories; the MIND AWARD aims to pave the way. Because we are now in big changes with global challenges for collective solutions and peaceful universal hierarchy. It is already twelve o’clock”, says Kunst.

=> MIND AWARD für Bewusstsein, Bildung, Forschung, Kunst (Kultur) und Frieden

=> MIND AWARD for Awareness, Education, Science, Art (culture) and Peace

Everything is awareness. Knowledge, science, language, cultures, yes even states, are the expression and result of human consciousness. That is why it is right and important NOW to finally give consciousness the value and place it deserves and which makes us creative people.

Let us **be** and stay awake as part of the **one** consciousness. Would you like to become a supporter as a peaceful person, partner, etc.? Thank you!
